Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 June 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

1. The disclosure is objected to because of the following informalities: U.S. Patent Application Serial No. 09/624,308 filed 24 July 2000 on lines 4-6 of page 1 needs to be updated to show that the application has been issued as U.S. Patent No. 6,612,447.

Appropriate correction is required.

2. Information Disclosure Statement filed on 6/26/03 has been considered by the examiner.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3-4 provides for the use of the blood filter, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

5. Claims 3-4 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over European Patent Application No. 406,485 (hereinafter referred to as EP '485. EP '485 teaches a filter for removing leukocytes from blood comprising a housing (7, 10) and a filter media (9) in the housing connected to a blood reservoir (2) (see figure 3) including an asymmetric membrane having a continuous porous structure and having first surface of the membrane having pore diameters smaller than the second surface wherein the pore diameters of the first surface is 14 microns and increasing toward the second surface with a pore size of 17, 21, 43 microns (see figures 4-9; abstract; col. 3, lines 52-57; col. 4, lines 17-30; col. 8, lines 13-44). Claims 1-4 essentially differ from the filter of EP '485 in reciting the majority of open area formed by cells intersecting the first skin surface having pore diameter of between about 12 microns and 28 microns. EP '485 teaches that leukocytes have a diameter of about 6 to 12 microns and filter with average pore size of about 6-14 microns and even pore sizes of 21-43 microns removes leucocytes (see col.7, lines 24-49). It would have been obvious to one having ordinary skill in the art at the time the invention was made to optimize the range of given pore size of the cells to effectively remove leukocytes, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.
